IE630 - Project Assignment

by [Saurabh Jain](#) - Tuesday, 25 March 2025, 2:48 PM

Dear Students,

The lecture notes from the have been uploaded to Moodle.

As we approach the final month of our course, it is crucial to gain hands-on experience with the concepts covered through project. Here are a few key announcements for the project.

Group Assignments:

The groups have been finalized based on your preferences or through random assignment. If you are not part of any group, **please send us an email immediately**. We will not be responsible for any project grading issues if you are not assigned to a group and fail to inform us now.

Assignment 1:

Each group must submit a document covering the following aspects:

1. Problem Definition & System Overview
2. Structured System Representation (Diagrams or process flows)
3. Assumptions, Data Sources, and Constraints
4. Objectives & Performance Metrics

Submission Details:

- Due Date: **02/04/2025 Wednesday (before class)**
- One submission per group is sufficient.

Let me know if you have any questions.

Thanks,

SJ
